

Hog Hair Media

Pads & Rolls

OVERVIEW

Our Hog Hair Media Pads and Rolls are available in a standard, blue, natural fiber mixture bonded with latex. These pads do not require frame support during installation because of the rigid structure and can replace any size furnace filter.

CONSTRUCTION

Hog Hair is a unique filtration media made of natural, durable fibers including coconut husk fibers, sanitized hog hair, a latex based binder and scrim backing. The backing is made of fire-retardant polyester. The filter media is bacteriostatic, meaning it will not support growth of mold, mildew or bacteria. Our Hog Hair Media Pads and Rolls are available in the sizes below and can be used in various applications.

APPLICATION

Hog Hair Media Pads and Rolls should be used in applications within harsh environments. They are well suited for use in snow, rain and heavy dust filled settings such as swamp coolers, paint booth applications and other moist environments.

STANDARD SIZES AVAILABLE

Hog Hair Pad - HHP	
W (in) x H (in) x D (in)	ITEM NUMBER
16" X 20" X 1"	HHP-011620

The Pamlico Air Team

Our Philosophy

At Pamlico Air, our goal is to provide clean air and better health through quality air filtration products and services. With over a century of combined industry experience, we utilize our team's knowledge and expertise to provide top-of-the-line customer service, manufacturing practices and sales transactions. We believe in our products and stand behind our desire to improve our customers' quality of life by cleaning the air they breathe.

Founded in 2019, Pamlico Air serves the US with plans to grow our manufacturing operations across the nation. Our target markets include commercial and industrial accounts, specifically wholesale and residential channels. Our customer-first and family-oriented principles make us professional yet personal in our business strategy. With a strong desire to leave a legacy for our communities, Pamlico Air works diligently to improve the air filtration industry and create products that better the air quality and health of our customers.
